AI ASSISTED CODING

LAB-14.5

P.Koushik

2303A51912

Batch-12

Task 1 – Image Gallery Website

Create an image gallery web page.

Requirements:

- **Display images in a grid layout.**
- **Use AI to:**

o Optimize layout using CSS Grid.

o Add hover zoom or overlay effects.

o Ensure mobile responsiveness.

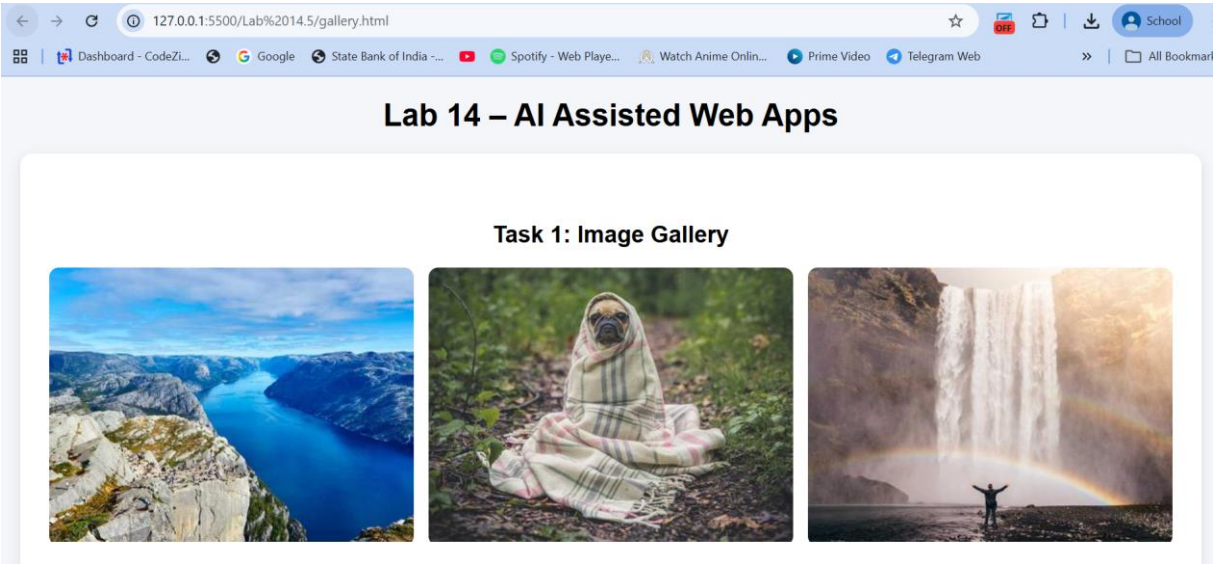
Prompt:

<!--Create a image gallery web page and make it responsive.

The gallery should display a grid of images.

Add hoverzoom and overlay effects for the images -->

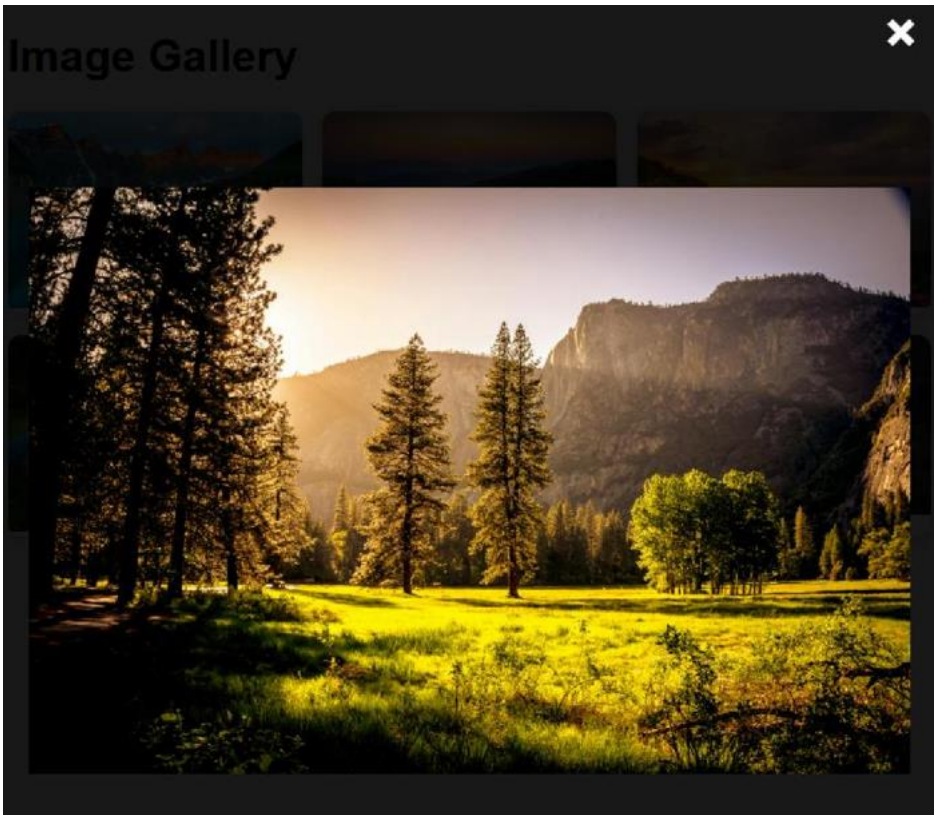
Given Output



Prompt 2:

Modify the code so that when a image is clicked it should be shown full screen and when the mouse moves to an image the image should become slightly bigger.

Given Output:



<u>Task 2 – Profile Card Generator</u>

Create a profile card web page.

Requirements:

• Display user image, name, role, and social media links.

• Use AI to:

o Suggest modern UI colors and fonts.

o Design the card using Flexbox.

o Add hover animation and shadow effects

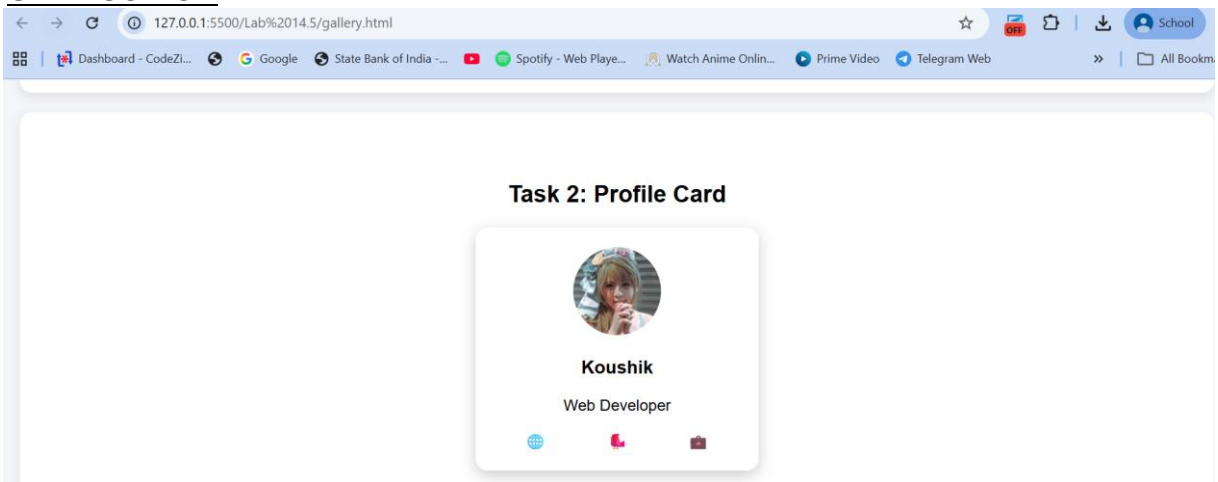
PROMPT:

<!--Create a profile card web page that displays user image, name, role, and social media links.

Use modern UI colors and fonts add hover animation and shadow effects to enhance the design.

Utilize Flexbox for layout and ensure the card is responsive across different devices.-->

GIVEN OUTPUT:



Task 3 -Develop a dynamic shopping cart system.

Requirements:

- **Add, remove, and update product quantities.**
- **Display real-time total price.**
- **Use AI to:**

o Manage cart state using JavaScript objects.

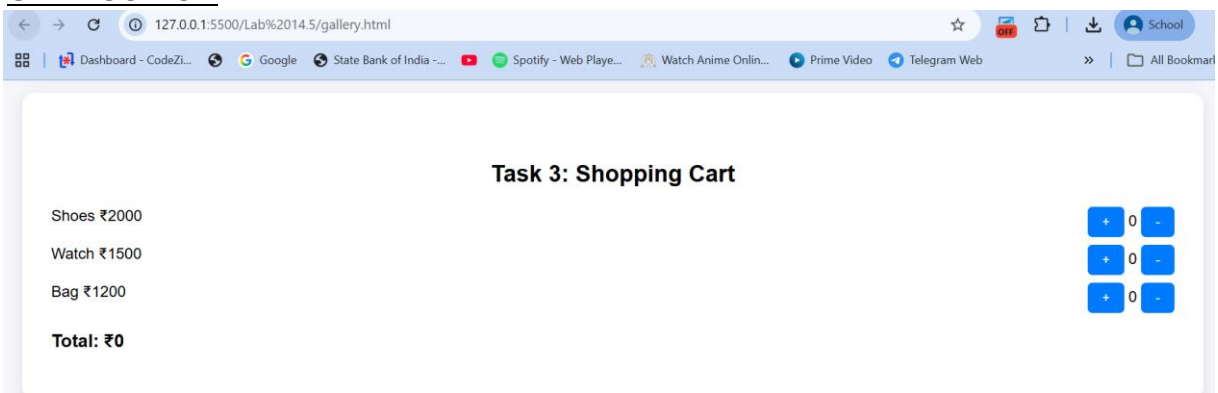
o Persist cart data in localStorage.

PROMPT:

<!--Develop a dynamic shopping cart system which adds, removes, and updates product quantities and display real-time total price.

Use AI to manage cart state using JavaScript objects and persist cart data in localStorage.-->

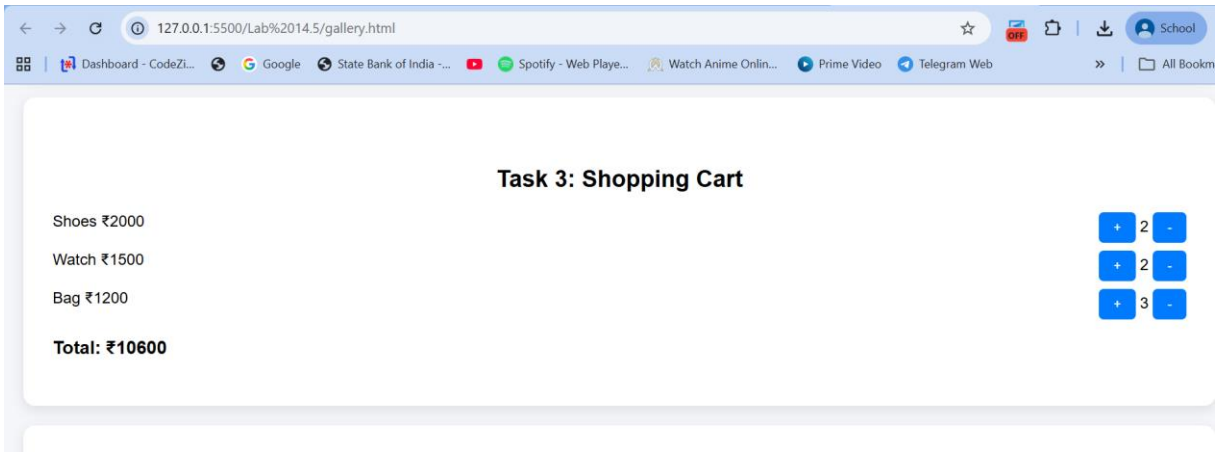
GIVEN OUTPUT:



PROMPT 2:

Modify the code to make the UI more visually attractive

GIVEN OUTPUT:



<u>Task 4 – Role-Based Access Control Application</u>

Create a role-based web application.

Requirements:

- **Admin, Editor, User roles.**
- **Conditional UI rendering.**
- **Use AI to:**

o Design access control logic.

o Maintain secure state transitions.

o Create scalable UI components

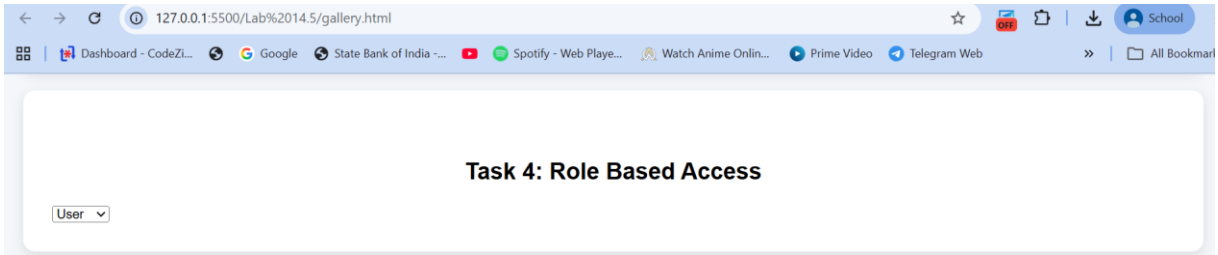
<u>PROMPT:</u>

<!--Create a Role-Based Access Control Application that has Admin, Editor, and User roles.

The application should conditionally render UI components based on the user's role.

Design access control logic. Maintain secure state transitions. Create scalable UI Components.-->

<u>GIVEN OUTPUT:</u>



Task 5 – Multi-Language Website

Design a multilingual website.

Requirements:

- **Switch languages dynamically.**
- **Persist language preference.**
- **Use AI to:**

o Structure translation files.

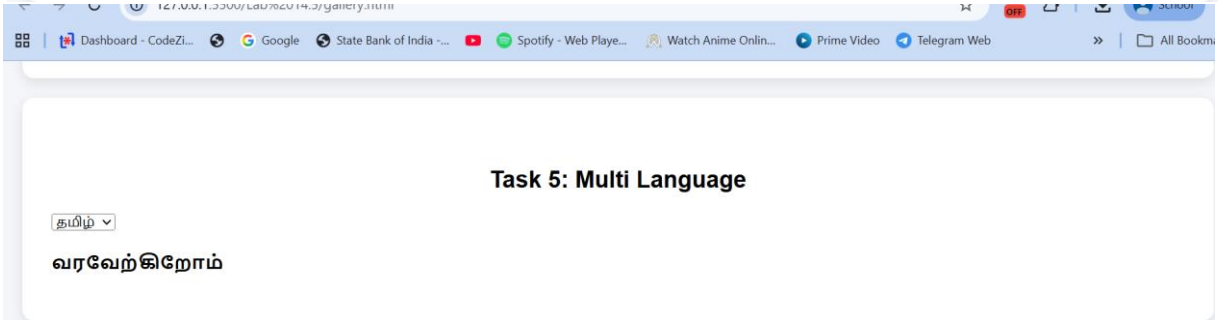
o Handle RTL/LTR layouts.

o Improve accessibility.

PROMPT:

<!—Create a multi-language website that switch languages dynamically, and persist language preference. Handle RTL/LTR layouts, and improve accessibility.-->

GIVEN OUTPUT:



Task 6 – Online Examination System

Create an online exam interface.

Requirements:

- **Timer, questions, and submission.**
- **Prevent multiple submissions.**
- **Use AI to:**

o Manage exam state.

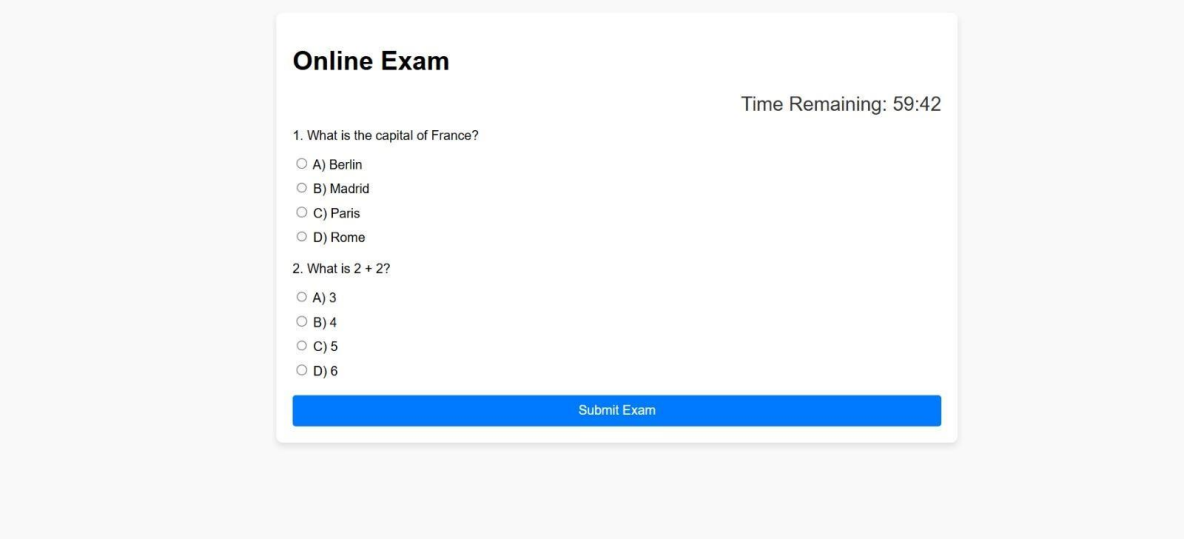
o Improve exam UX.

o Ensure accessibility.

PROMPT:

<!—Create an examination system which includes timer, questions, and submission and also prevents multiple submissions. Manage exam state, Improve exam UX and Ensure accessibility-->

GIVEN OUTPUT:



Explanation: In this lab, we developed different web applications using HTML, CSS, and JavaScript with the help of AI. We created an image gallery, profile cards, shopping cart system, role-based access system, multilingual website, and an online exam system.
By using AI, we improved design, responsiveness, and user experience. We also learned how to make websites interactive, accessible, and efficient. This lab helped us understand how AI can make web development faster, smarter, and more effective.
